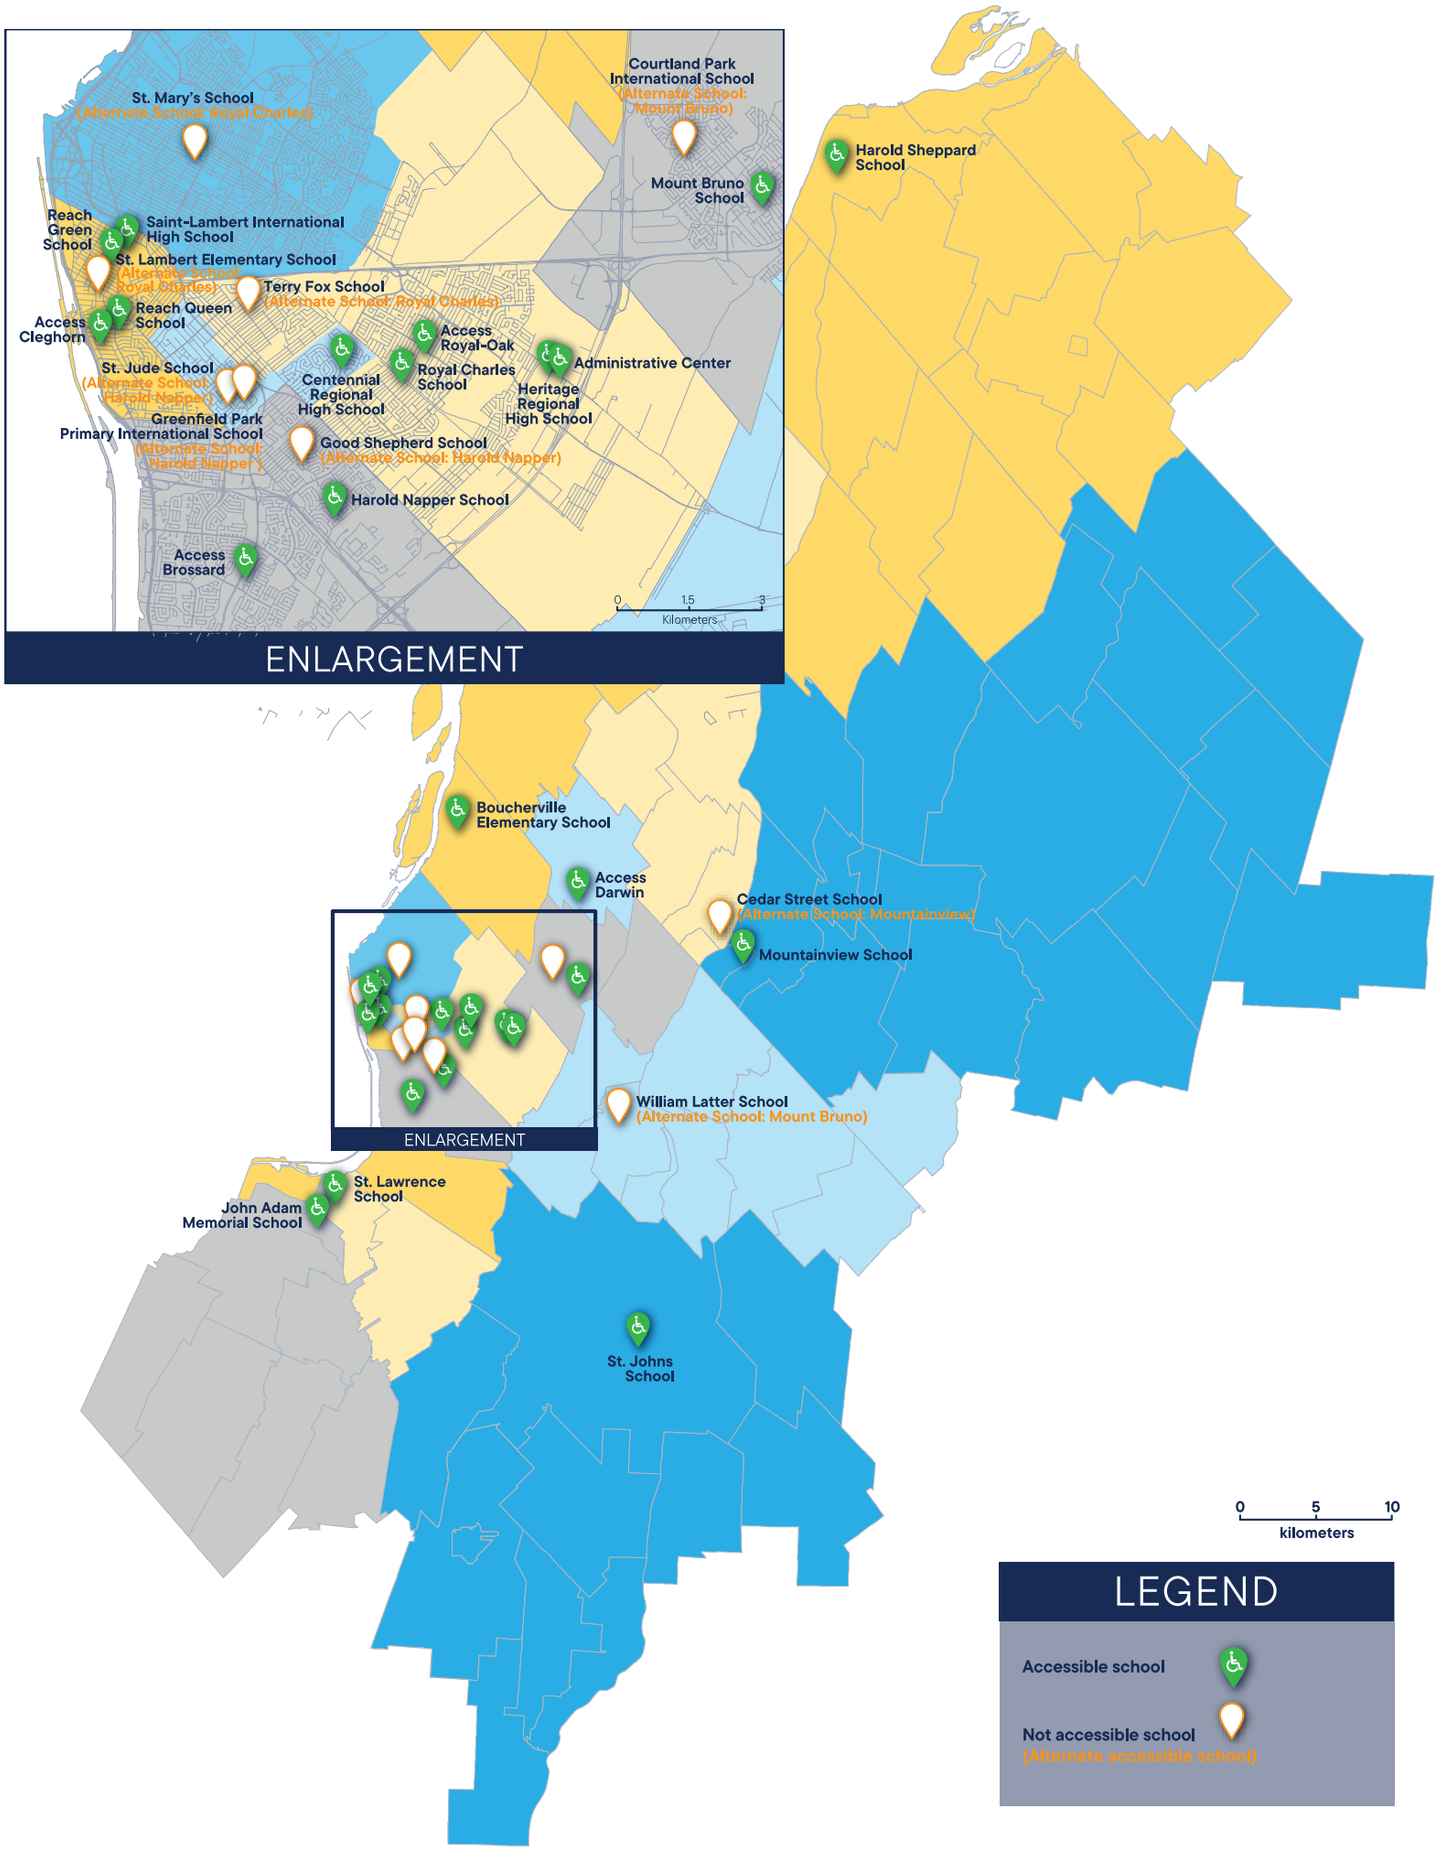
ACCESSIBILITY OF BUILDINGS FOR PERSONS WITH DISABILITIES

We are pleased to provide our students and staff with access to all the services offered in our schools, ensuring accessibility for individuals with disabilities. In cases where certain facilities are not yet fully accessible, we implement alternative solutions to meet the specific needs of each student.

When accessibility in a particular school is not possible, students have the option to attend an associated school with appropriate accommodations. School transportation is provided to ensure safe and comfortable travel. This approach allows students to have a fulfilling school experience and fully participate in student life while receiving the necessary support and services for their success.


We remain committed to creating an inclusive environment, addressing everyone's needs with diligence and care.
